# Kalinga Kumar Khatua

Full Stack Developer & UI Designer #

Bhubaneswar, Odisha, India

## Summary

---

## Experience

Cisco

Campus Ambassador

August 2023 - Present (11 months)

PlanOCast

Senior Software Developer

May 2023 - December 2023 (8 months)

As a UI/UX designer and full-stack developer, I was responsible for creating the user interface and user experience of the web application, as well as integrating the front-end with the back-end API. I also participated in product discussions and feedback sessions with the stakeholders and the users.

Some of my achievements and skills include:

- Designed the whole UI using Figma, which was shown to the initial customer for demo purposes, following the best practices of UI/UX design and accessibility.
- Implemented and hosted the responsive web application using React, React Query, Vite, and Render, ensuring high performance, scalability, maintainability, and easy deployment.
- Integrated the front-end with the RESTful API using Axios and React Query, handling authentication, authorization, error handling, and data validation.
- Collaborated with the back-end developers using Git and Excel, following the agile methodology and code review process.
- Conducted user research and incorporated the user feedback and analytics into the design and development process.
- Paid attention to every subtle detail that enhanced the micro interactions and made them more intuitive and satisfying.

- Faced and solved the challenge of figuring out the best practices and maintaining code quality without any supervision and on my own, by researching, learning, and applying the latest trends and standards in UI/UX design and front-end development.

---

## Education

Odisha University of Technology and Research (Formerly College of Engineering and Technology, Bhubaneswar)

Bachelor of Technology - BTech, Computer Science · (2021 - 2025)
